

MessageVision is a leading provider of solutions for automating, managing and delivering business-critical information by harnessing the power of fax, Web, e-mail, and emerging communications technologies.

To further compliment MessageVision's suite of services we partner with our co-subsiary, Resolutions to offer state-of-the-art Information Management Solutions that organize the full life cycle of our clients' business-critical information. A full spectrum of Enterprise Content Management solutions, providing simple, intuitive, yet powerful, Knowledge Management tools, allowing organizations of all sizes to Process, Capture, Manage, and Protect their business-critical information.

MessageVision clients may take advantage of solutions that optimize the content and appearance of documents and to deliver them via Print, Fax, E-Mail, Web, or Imaging and Archiving.

MessageVision integration offers compelling business advantages by extending the use of present and legacy applications, rather than force costly migrations or system abandonment. A primary ERP automation tool for our iSeries AS400 customers is **R-Output Manager**

## R-Output Manager for J.D. Edwards Intelligent Dynamic Information Delivery...Enterprise Class Performance

R-Output Manager is ideal way to for companies using **JDE ERP** solutions to automate report distribution and archiving. The software, using 'if then' logic based on system values, sorts and separates batch spool files or **EnterpriseOne/OneWorld** PDF output into individual sets of pages (i.e. one set per customer), and then converts the reports into PDF, TIF or HTML files for emailing, faxing, archiving or placement on a Web server. Extensive implementation of variables allows spool file or PDF data and database fields to be passed as command parameters and also enables the creation of dynamic email and fax cover pages.

R-Output Manager can add gray bar background and/or an image overlay to documents in PDF format. R-Output Manager integrates easily with our electronic forms solution, or can also electronically distribute reports that do not require electronic forms.

### Benefits of R-Output Manager:

- Operates in both production and test environments simultaneously
- Automatically creates index information for archive software
- Automates FTP or IFS transfer to other platforms
- Creates PDF file names using variables
- Retrieves fax numbers and email addresses from spool files, PDF files, or database files
- Allows users to run any iSeries program or command as part of an automation sequence or 'lights out' operations

---

### A combined range of solutions integrating with J.D. Edwards includes:

- **R-Forms:** Electronic forms design presentation and distribution.
- **MessageVision:** Enterprise fax solutions for production, desktop, and broadcast faxing.
- **R-Checks:** Turnkey check printing solution
