

SIMPLY FIND IT FAST

Locked in your business is an asset you rely on to do your job. It is the most valuable asset in your business and at Redmap we call this "Information Capital". It is the endless stream of emails, letters and electronic documents that builds this Information Capital.

But how do you find it?

Simply Find It Fast with Redmap's ManagePoint. By centralizing all of this Information Capital, regardless of the file type,

your **business** will be able to
find **information** based on its content.

How can we do this?

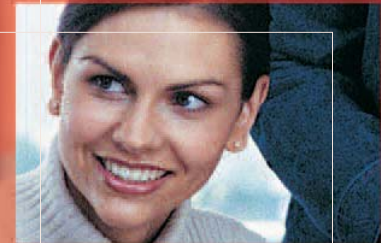

Our Artificial Intelligence (AI) engine "reads" the information as it is being filed in ManagePoint and provides immediate access to the content.

By using the AI, your people will be able to find any information based on the content, even if it's a zipped attachment to an email received weeks, months, even years ago!

This instant access to the Information Capital of your business will mean client queries are answered in seconds, not days. ManagePoint will unlock the hidden information within your organization.

Furthermore, by applying the ManageAnywhere web module, your Information Capital can be retrieved anywhere in the world at any time of the day. Your business will be empowered by allowing internal and external parties direct secured access to the information they require, when and where they need it.

Access to your Information Capital worldwide – Simply Find It Fast.

ManagePoint

ManagePoint is simple to implement which means minimal down-time for your business. The collection and storage of the business's Information Capital is largely automated meaning your people spend time using the information, not storing or searching.

ManageAnywhere

Implementing ManageAnywhere is easy. Your people can make decisions on the run by securely accessing and managing information from anywhere in the world via the Internet.

information management with redmap's solutions

Feature

Benefit

 	Artificial Intelligence Capabilities	Find any information based on the content
 	Email Archive	Your business can meet compliance regulations by keeping and storing all emails without the heavy burden on your mail server
 	Uses the latest version control technologies	Ensures the document you are using is the correct version
 	Highly secure 3 tiered database structure	Allows greater security over your sensitive information
 	Audit Tracking and Reporting	Instantly track who is changing or deleting information and when it occurs
 	Circulate	Archive information onto CD/DVD at the click of a button to save the storage headache and make your information mobile
 	Restrict access to certain documents based on user log-in	Ensure sensitive information is not viewed by the wrong people
 	XML based protocol	Data can be accessed and integrated with third party software applications
 	Email directly from ManagePoint	No need to open more software applications
	Access information from anywhere in the world, any time of the day	Information and documentation no longer needs to be carried with you when travelling. This in turn decreases information search and retrieval time while out of the office
	ManageAnywhere licenses are supplied as concurrent users	Decreases the need to purchase individual licenses for every computer
	Customizable user interface to suit your corporate image	Using ManageAnywhere as an information portal, you can allow access to specific information based on the user log-in. Increase branding opportunities to external parties
	Offered as a remotely hosted service	Decreases organization infrastructure requirements by allowing companies to leverage the Internet to perform information management
